Experience

Technical Support Intern

Ceres Canopus Pvt Ltd

Dec 2025 – June 2026

Pune, India

- Provided L1/L2 technical support to 100+ internal users, troubleshooting hardware, software, and network issues with high first-call resolution rate.
- Managed user accounts and access permissions in Active Directory and LDAP, handling onboarding/offboarding requests and ensuring good compliance with security policies.
- Diagnosed and resolved network issues including IP conflicts and DNS failures using ping, traceroute, and ifconfig commands; assisted in OS installation (Windows/RHEL) and software deployment for 15+ new workstations.
- Documented recurring issues and created knowledge base articles, reducing average ticket handling time
- Escalated complex server and network issues to senior administrators, ensuring timely resolution and maintaining high service level agreement compliance.

Junior Data Analyst (Intern)

Sri Hari Packaging Pvt Ltd

Apr 2025 – Oct 2025

Pune, India

- Extracted, cleaned, and transformed operational data from MySQL databases using complex SQL queries (JOINS, subqueries, aggregations), supporting daily reporting.
- Designed and published interactive Power BI dashboards visualizing KPIs including server uptime, network bandwidth utilization, and ticket resolution trends, used by department heads for weekly reviews.
- Automated weekly Excel reports using VLOOKUP, Pivot Tables, and Power Query, reducing manual report generation time from 4 hours to 30 minutes.
- Validated data integrity across many source systems, identified discrepancies through root-cause analysis, and presented monthly findings to the operations head.

Skills & Certifications

Operating Systems

Red Hat Enterprise Linux (RHEL 9), CentOS, Ubuntu, Windows Server

Networking

Cisco IOS, Routing (OSPF, EIGRP, BGP), Switching (VLANs, STP, EtherChannel), ACLs, NAT, VPN, DHCP, DNS, SNMP

Linux Administration

User/Group Management, LVM, NFS, Samba, Apache/Nginx, Firewalld, SELinux, Cron, Systemd, Kernel Tuning

Automation & Scripting

Python (Basics), Bash, YAML, Ansible (Basics)

Monitoring & Reporting

Nagios, Zabbix, Power BI, MySQL, Prometheus (Basics), Grafana (Basics)

Cloud & Virtualization

AWS (EC2, VPC, S3 - Basics), VMware

Tools & Platforms

Git, GitHub, Packet Tracer, GNS3, MS Excel, ServiceNow

Certifications: RHCSA (Training Certificate) | RHCE (Training Certificate) | CCNA (Training Certificate) | AWS (Training Certificate) | Python (Core)

Projects

Project 1: Enterprise Linux Server Hardening & Performance Monitoring

Lab Environment

- Deployed RHEL 9 with LVM partitioning (3 logical volumes) and configured a secure Apache web server with SELinux in *Enforcing* mode, implementing strict firewalld rules to restrict SSH access to authorized IPs only.
- Wrote advanced Bash scripts scheduled via cron to automatically capture CPU, RAM, and Disk utilization metrics every 5 minutes.
- Configured NFS, Samba, and DNS services with robust security policies, ensuring seamless file sharing and name resolution across many virtual machines in the lab environment.

Project 2: Multi-Site Cisco Network Simulation with Power BI Dashboard

Lab Environment

- Designed and configured a complex multi-site network in Cisco Packet Tracer using OSPF (Area 0), VLAN segmentation (3 VLANs), ACLs, NAT, and DHCP, ensuring secure inter-branch connectivity.
- Enabled SNMP polling to extract real-time interface metrics (bandwidth, uptime, errors) from routers/switches and stored time-series data in MySQL for historical trend analysis.
- Built an interactive Power BI dashboard to visualize network health, bandwidth utilization trends, and ACL violation alerts, reducing simulated Mean Time to Detection (MTTD) by 25%.

Education

Master of Computer Applications (MCA)

(2022 – 2024)

Bachelor of Computer Science (BCS)

(2019 – 2022)
